

COMPANY PROFILE

Our Services:

1. MWD/LWD/Directional Drilling
2. Completions- Single & Dual
3. Well Interventions

About Us

We are a Team of Reservoir, Petroleum, Drilling, Completions and Production Engineers and HSEQ professionals with diverse oil field experiences working together to deliver on your objective by maximizing your asset value through flawless engineering and minimizing cost.

By partnering with you based on your preferred operational model, we offer both discrete and Integrated services for effective project execution.

We offer targeted training services of personnel.

Through our extensive network of associates and partnerships, we are able to connect you with the appropriate supply channels for whatever resources you might need for the development of your asset.

Our services include but are not limited to Asset Evaluation, Well Completion, Rig Supply services, MWD/Formation Evaluation and Directional Drilling, Well Work-over and Interventions, Production Enhancement, Well Integrity and Plug & Abandonment.

We have a pool of talented experts that will deliver on your objective.

Our Mission

Our local experience is our strongest asset: our success demonstrates the importance of providing the right people, dedicated to excellent job execution, not once, not twice, but every time.

Our Vision

To be the partner of choice for the timely and qualitative delivery of projects in Africa, now and every time the need arises.

Our Core Values

Professionalism because we know that any performance below quality standard is unacceptable to us.

Integrity because we are accountable to all stakeholders, we do not compromise on ethics and quality standards

Partnerships because we understand the impact of strategic partnerships, we partner with the best hands to deliver real and measurable values.

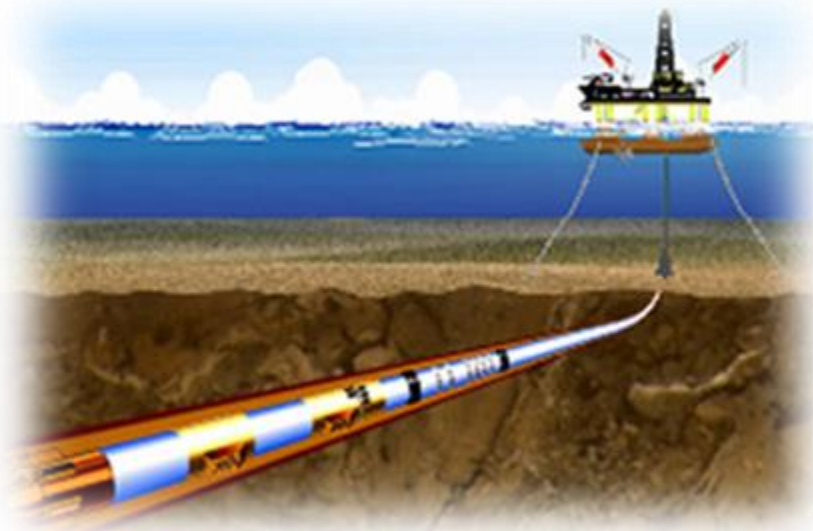

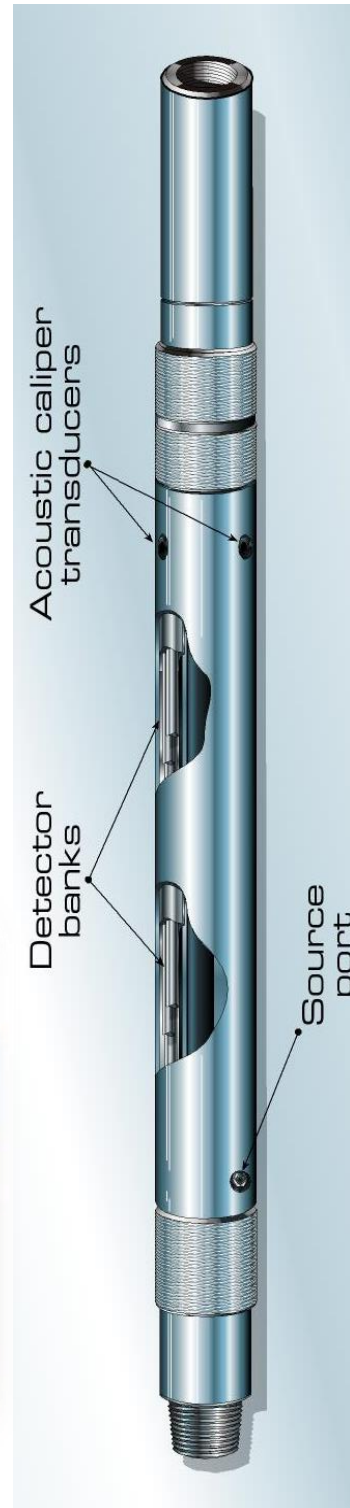

Courage because we chose Africa, and we choose to fearlessly tackle the hardest tasks, in the hardest regions and under the toughest climates.

MWD/DIRECTIONAL DRILLING SERVICES

Measurement While Drilling

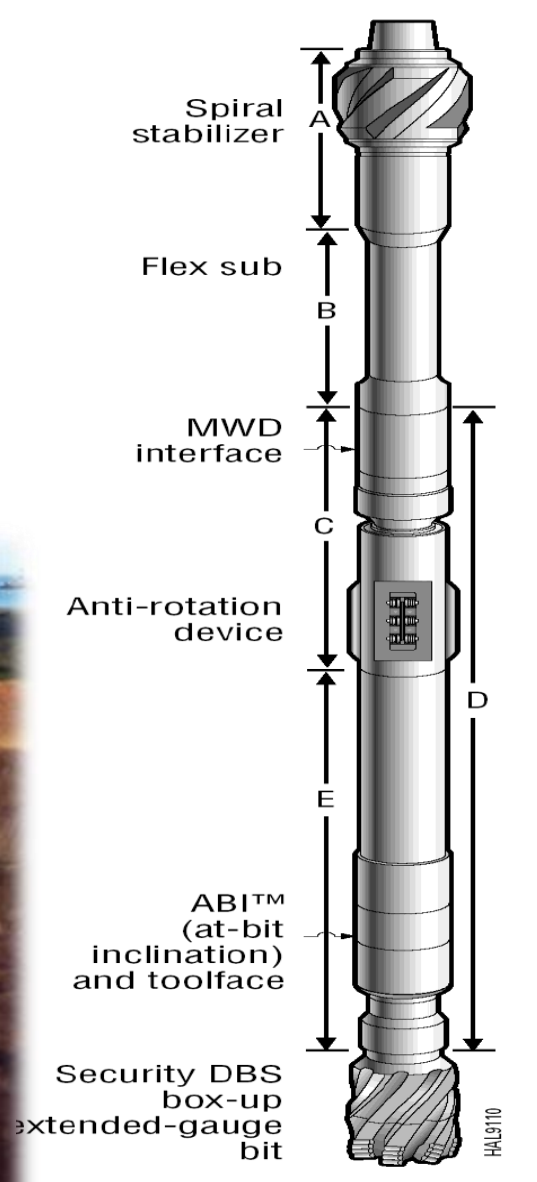

- ✓ Formation Gamma Content
- ✓ Formation Evaluation While Drilling.
- ✓ Resistivity and Gamma Ray
- ✓ Neutron and Density Logging
- ✓ Pressure While Drilling Measurements
- ✓ Drilling Dynamics Monitoring
- ✓ Acoustic Caliper
- ✓ Realtime Operations – RTO
- ✓ LWD Sonic Measurements
- ✓ Geo-steering services
- ✓ Realtime Formation Tester – GeoTap

MWD/DIRECTIONAL DRILLING SERVICES

Directional Drilling

- ✓ Well Planning and Design,
- ✓ Vertical, Deviated / Horizontal Well Drilling,
- ✓ Well Borehole Surveys.
- ✓ Jetting assemblies.
- ✓ Steerable Mud-Motor drilling.
- ✓ Rotary Steerable Drilling (Geopilot)

WELL INTERVENTION SERVICES

We provide the following well support services and urge you to rely on our experienced teams and proven technology in critical operations to produce at lower lifting costs.

Pumping And Stimulation

Stimulation and hydraulic fracturing operations are critical to maximizing well and field value. Kaptain Energy provides versatile, customized systems to exceed your expectations in deep water, extended-reach unconventional completions, or working a remediation stimulation project. We have efficient, reliable stimulation and pumping solutions that can optimize production performance of a barrel of oil.

Contact your Kaptain Energy representative to find out how our stimulation and hydraulic fracturing operations can help you take control of your production.

Coiled Tubing Services

Coiled tubing (CT) is indispensable to many wellsite operations. The greatest value is much more than conveyance - it's the performance achieved at the end of the pipe.

CT solutions from Kaptain Energy combine experience, a dedicated research and development facility, and a global laboratory partnerships that's focused on understanding the reservoir first.

We offer efficient and reliable practical solutions for well cleanouts, stimulation, and various other specialized applications. Our CT deployment teams help you achieve optimized operational and economic performance advantages. In addition, our Tubing Research and Engineering Center improves and extends CT applications, drawing upon a practical blend of research and field experience.

Through the continuous efforts of our research engineering team, wellbore intervention using CT is continuously safer and more predictable, efficient, and effective.

what
we
do

Contact Kaptain Energy today to find out more information about our CT systems and services.

Coiled tubing & Nitrogen Services offered by Kaptain Energy include the following.

- Well activation
- Sand wash
- Wellbore Clean out
- Solvent soak
- Acid Stimulation, etc

Slickline Services

With qualified personnel and up to date equipment we are constantly looking at ways to improve excellence in our Slickline Services. We also provide technical and professional advice on challenges faced down hole. Some of the Slickline Services we offer include the following.

- Well completion
- Gas lift valve change out
- SCSSV change out
- Well plugging/abandonment
- BHP & Temperature survey
- Sand bailing operations
- Swabbing operations
- Tubing investigations
- Well reactivation
- Zone change
- Fishing operations

Cementing/Remedial Services

Kaptain Energy provides various types of cementing pumping operations for mainly remedial operations. We can execute cement plugs for isolation, side track or abandonment and squeeze operation. We also design the slurry to meet the rheological needs of the client. We assist our clients with technical advice on how we can positively execute these operations safely, professionally and with excellent service delivery guaranteed.

Filtration Services

We provide filtration services for different kinds of operation; we formulate and filter brine for wellbore use, it can be used for completion or well kill. We supply different sizes of filter cartridges and diatomaceous earth materials for any filtration operation.

Kaptain Energy

Completions & Workovers

Kaptain Energy Resources offers a wide range of production enhancement & optimization services ranging from initial completions design and installation to workovers and well interventions:

Completions Conceptualization & Design

- Initial Completions, Well Modeling & Design
- Artificial Lift Design & Installation e.g Gaslift, Electrical Submersible Pumps (ESPs)
- End-to-End Project Management Services
- Production Optimization

Lower & Upper Completions

- Sand control design and installation
- Cased Hole Gravel Pack
- Open hole Gravel pack
- Stand Alone Screen Operation
- Expandable Screens, etc
- Single String Completion
- Dual String Completion
- Multi Lateral Completion

Well Workovers

- Wellbore utilization optimization
- Well workovers, design, planning, execution.

Strategic Procurement

Kaptain Energy Limited has partnered with several reputable companies in Africa, the United States, Europe and Asia to provide an unmatched buying and procurement experience to our customers in the oil and gas industry across Africa.

Our customers cut across the entire oil and gas value chain with varying needs and at various stages of development. Most of our customers are in the process of transitioning to cleaner energy and require very tailored approaches. Kaptain Energy will always be there to meet the needs of these clients and evolve with the ever-changing requirements of the industry.

The COVID-19 pandemic has taught the world to think about supply chain management differently. Our procurement strategy is global, yet very nimble to accommodate unplanned disruptions to the chain. We offer inspection and warehousing services, where needed.

We provide an end-to-end logistical experience from the factory to the client's premises even as our freight partners understand our needs, which are the needs of our clients.

We excel at procuring

- Instrumentation & Automation systems | Gas processing equipment, spares and
- Accessories, Crude oil export hoses | Tanks, compressors, pumps and generators
- Skids and packaged systems | Pipes, valves and fittings
- Structural steel and tubes | Turbines | Umbilicals and submarine
- cables Caterpillars, excavators, forklifts, swamp-buggies, and fire-trucks

We are always adding new procurement areas to the list above and open to providing tailored solutions to our clients.

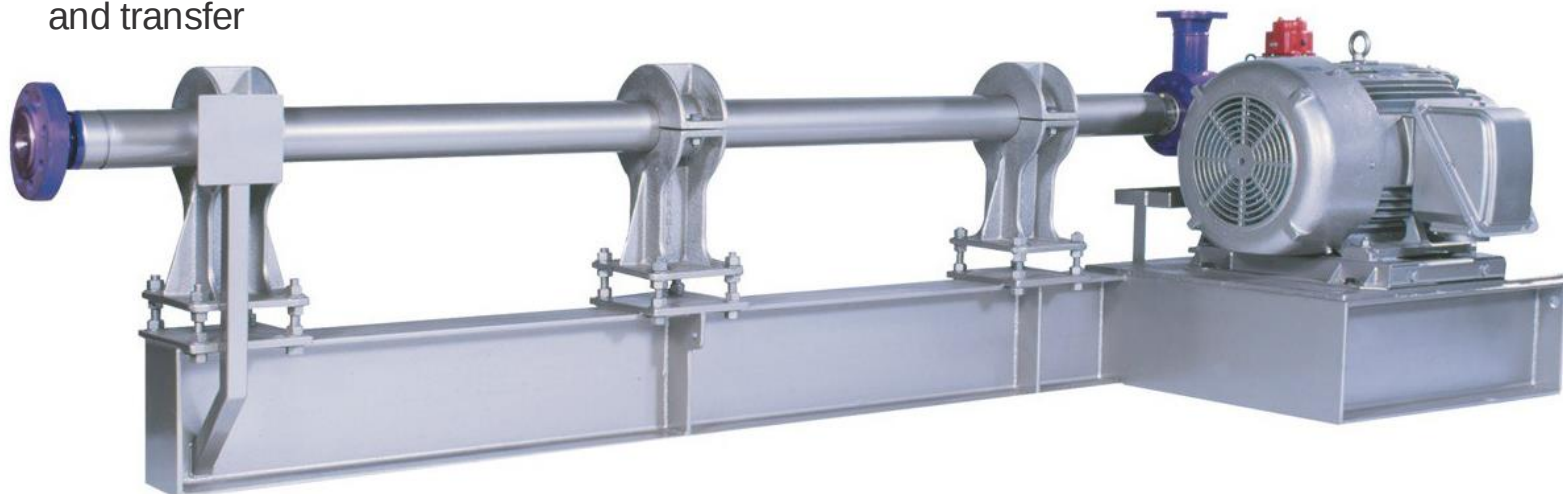

Chemicals And Materials Supplies

Drilling and Production Fluids Solutions from Kaptain Energy are designed and engineered to help you optimize drilling and production performance. Working with us, you will gain access to technologies, analysis and design services, and expert application assistance that deliver serious performance and profitability benefits.

HORIZONTAL PUMP SYSTEMS

The industry leader in horizontal pumping systems (HPS), **Levare** offers fit-for-purpose HPS technology, products, and services to minimize costs and maximize return on investment. We provide a cost-effective, low-maintenance, multistage horizontal centrifugal pump solution for surface pumping applications requiring fluid injection, lift, and transfer
